
UPCYCLING

In the small workshop, used bicycle tubes are carefully sorted, cleaned and they get a new life - as purses, a cases, pockets or saddle bags. But sine not only recycles bicycle tubes, it also processes left overs from upholstery and seat bag productions, billboards, old jeans and much more. The vinyl bags are stitched together from synthetic leather residue of upholstery productions. They are water resistant, washable and come in different colour combinations.

PRODUCTS

- Coasters made from skateboards
- Watches from the company „Stamps“
- Phone cases made from bicycle tubes
- Bottle openers
- And lots of little things e.g. key chains, and postcards,..

PRODUCTION

Brigitte the owner of sine at work cutting and sewing used bicycle tubes.

Sine uses old bicycle tubes which it gets from bike stores to make new and stylish products from them.

These are all on-site products.

1st Step: Washing the used bicycle tubes

2nd Step: Cutting the tubes into the right shapes and sizes.

3rd Step: Sewing the different tubes together

4th Step: Adding a colourful zip onto the product

Finished products (pencil cases, phone cases, pouches,...)

Other products which are produced in the store are bags made from old jeans and synthetic leather residue.
